Belarus, Minsk (ready to relocate)

ABOUT ME

Very hardworking, communication skills at a high level, I appreciate good code, colleagues and well-oiled processes) Looking for a company where I will be engaged in interesting projects, and also plan to grow up to Full-Stack developer. I study at the university on a correspondence course, I have a military ticket with the marking NGM without re-examination. I am always learning in my free time, improving the current stack and supplementing it by learning new technologies, mainly writing some pet projects.

MAIN STACK

- C#, ASP.NET Core, .NET Core, Entity Framework Core
- MediatR, FluentValidation, AutoMapper, Refit, Serilog
- JWT Auth
- NUnit
- AWS (Amazon S3, IAM), SonarQube
- RabbitMQ, Hangfire, SignalR, Firebase, Elasticsearch
- Docker (Portainer)
- SQL
- CI/CD
- DBMS (MS SQL Server, PostgreSQL)
- Git
- Angular (Basic), React (Basic)

EXPERIENCE

.NET DEVELOPER

Solid Expert - Full Time

Minsk, Belarus - Remote work, July 2023 - June 2024

Worked in a managed team, two backend developers (including me) + 4 frontend developers + 1 incoming tester + BA + PM + Team Lead;
- Sometimes intercepted dailies and helped with demos, distributed tasks to the front, and also helped the BA with the transformation of business requirements into specs.

The main project in the company was the development of an internal CRM system, specifically in it I was engaged in the following:
- Created various microservices from scratch, and also refactored existing ones before me;
- Was engaged in the development of nuget packages for their future interaction in microservices;
- Was engaged in writing NUnit tests;
- Designed and administered databases;
- Was involved in CI/CD automation;

At one point I had to switch to a new technology for myself, such as .NET MAUI. There I developed a file manager application, which was internally connected to the company's internal microservices, synchronized with files and folders on the computer/cloud (in simple terms, an analogue of iCloud, but for the CRM system).

And also developed a small application - an XML editor for PM.

Stack:
- C#, .NET Core, ASP.NET Core, Entity Framework Core, MediatR, FluentValidation, AutoMapper, Refit, Serilog, JWT Auth, NUnit, AWS (Amazon S3, IAM), SonarQube, RabbitMQ, Hangfire, SignalR, Firebase, Elasticsearch, Docker (Portainer), DBMS (MS SQL Server), SQL, CI/CD, Git.

EDUCATION

BELARUSIAN STATE UNIVERSITY OF INFORMATICS AND RADIOELECTRONICS

Bachelor of Engineering - BE, FCT, Software Engineering (correspondence)

2024 - 2028

COLLEGE OF BUSINESS AND LAW

Secondary specialized education, Information technology software (full-time)

2020 - 2024

EXPERIENCE

.NET DEVELOPER

Renaissance Hotels - Professional Training

Minsk, Belarus - Remote work, July 2023 - June 2024

Completed industrial and technological and pre-graduation practice in the IT department.
Developed a software tool for automating the work of a hotel administrator.
Automated the following processes:
• Keeping records of reservations, guests, rooms and employees, as well as providing additional services to hotel guests;
• Hotel management and operation (including effective inventory management, resources, flexibility of staff work schedules and accounting of financial flows);
• Infrastructure management, such as buildings, equipment, communications, maintenance and cleaning;
• Creating reports on hotel occupancy, average booking cost, profitability for different periods and other key indicators;
• Implementation of an analytics system for demand forecasting and tariff optimization based on data analysis;
• Creating a module for managing guest feedback, including processing reviews, suggestions and complaints;
• Developing a loyalty system for regular customers, including accrual of bonuses and provision of special offers.

Stack:
- C#, .NET Core, Entity Framework Core, ADO.NET, Windows Forms, WPF, Docker, Microsoft SQL Server, SQL, Git, Microsoft Office.
